DETAILED ACTION

1. This office action is in response to Applicants' Amendment of 10 January 2005.
- 1.1 **Claims 1-20** remain pending.
- 1.2 The objections of record are withdrawn in response to Applicants' amendment.
- 1.2.1 The prior art rejections of record are maintained in response to Applicants' amendment.

Response to Arguments

1.3 Applicants' arguments have been fully considered, but are not deemed persuasive because 'intra-decoder' is not recited in all the claims as alleged on page 7 last paragraph, and the prior art of record does not limit intra-decoder processing exclusively to non-feedback processing.

Newly found **Boyer** (US Patent No. 6,347,389) also discloses, in col. 6 lines 9-12, 48-53, equivalent feedback among intra RS decoder blocks to optimize symbol processing.

Examiner maintains that the prior art of record does allow for intra-decoder processing via synchronization means wherein coding/decoding tasks are effected without symbol/data timing contention.

Claim Objections

2. The claims, in passim, recite 'adapted to.' It has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138. **Claims 11, 19** recite 'selected from a group comprising,' which is an improper Markush format. Appropriate correction is required.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2133

3.1 This action is not made final because claims objections herein formulated are not due to Applicants' amendment.

3.2 Any response to this action should be mailed to:

Commissioner of Patents and Trademarks, Washington, D.C. 20231
